

Blind Football – Information Sheet

About the Sport

Blind football (formerly known as Football five-a-side) has officially been a part of the Paralympic program since the Athens 2004 Paralympic Games.

Blind football follows the same rules as the International Federation of Associated Football, except there are five players per side, the field of play is smaller, all team members except the goalkeeper play with eyeshades, the ball makes a noise when it moves, and there is no offside rule.

Every football match is played between two teams with four athletes who are blind and one sighted or visually impaired goalkeeper on the field as well as five substitutes. Additionally, each team has a guide behind the opponent's goal to direct the players when they shoot.

A football match lasts 50 minutes with two halves of 25 minutes each and a 10-minute half time in between. The winning team is the one that scores the most goals during a match.

Who can compete?

Blind football is open exclusively to athletes with a vision impairment. Athletes are required to submit medical reports and meet the minimum impairment criteria in order to compete.

Eligible impairments	Description	Minimum Impairment Criteria
Vision Impairment	Impairment of the eye structure, optic nerves or pathways, or vision area of the brain, resulting in a loss of vision in both eyes. Caused by conditions such as albinism, macular degeneration, macular or cone rod dystrophy and retinitis pigmentosa.	Men's Blind football: Players are blind or have minimal vision. Visual acuities (how far they can see) are poorer than logMAR 2.60 (6/2400) in the better eye. Women's Blind football: Vision loss in both eyes. Visual acuities (how far they can see with best correction) less than or equal to logMAR 1.00 (6/60) in the better eye; or Visual field restriction in both eyes (how wide they can see) to less than 40 degrees diameter in the better eye.

Blind football Sport Classes

Sport Class	Description (Guide Only)
Athletes with Vision Impairment	
B1	Men's Blind football: Players are blind or have minimal vision. Visual acuities (how far they can see) are poorer than logMAR 2.60 (6/2400) in the better eye.
B1, B2, B3	Women's Blind football: Vision loss in both eyes. Visual acuities (how far they can see

Sport Class	Description (Guide Only)
	with best correction) less than or equal to logMAR 1.00 (6/60) in the better eye; or Visual field restriction in both eyes (how wide they can see) to less than 40 degrees diameter in the better eye.
Not Eligible (NE)	Players who do not meet the minimum criteria for the Para sport classes may still be able to compete. B2 & B3 athletes may still be able to compete as goalkeepers. Contact Australian Blind Football for more information.
